---

Sean,

Thanks for the very rapid follow-up! We agree it was a very productive meeting, and really appreciate the time and attention you and your team are giving the project.

Bob

Hello Ryan and Bob,

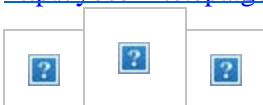

Thank you again for a very productive meeting this week. I wanted to let you know that EPA confirmed today that NMFS is not concerned with EPA going outside of the fish windows for sampling, if needed, so long as common sense BMP's are followed (e.g. sorbents for our little sheening problem) and we work to do as much in the windows as we can. We'll of course work to standardize these BMPs across harbor projects as appropriate, knowing that some site specifics will vary.

Also, NMFS confirmed that with the appropriate interlocking wall, going beyond the fish window would be allowed (installation within the window) for dredging and demob. A few details need to be worked out with Genevieve, but I wanted to follow up with you on these important questions.

Have a good weekend!

S
